

The GCP-100 is a Clamp-Type Probe Designed to Measure AC and DC Current waveforms. The Current Measurement Ranges from 50mA to 100A.

### Clamp to Measure : Safe and Easy

To perform current waveform measurement, just clamp the jaw around the conductor-under-test and connect its lead to the BNC input of an oscilloscope. Breaking the circuit and connecting an ammeter in series is no longer necessary.

### Current Measurement from DC to 100kHz for Various Instruments

Using the combination of a Hall-effect sensor and an AC current transformer, the GCP-100 provides accurate measurement from DC to 100kHz. The dual measurement range spans 50mA~10A and 1A~100A. In addition to oscilloscopes, the GCP-100 can also be connected to multimeters and data loggers.
